

Jesús Armando Gutiérrez Nery, Frontend Developer

Front-end Software Engineer with experience developing modern and scalable web applications. I have worked remotely with international teams, consolidating my English communication skills and adapting to multicultural environments. My focus is on interface optimization, continuous improvement, and delivering high-impact solutions.

Employment History

Frontend Developer at IMSS, Mexico City

August 2024 — September 2025

- **SIRI – Real Estate Risk Identification System**
 - I implemented administrative menus, search filters, and Excel reports with unique keys, increasing **data accuracy (+25%)** and **reducing query errors (-30%)**.
 - I developed interactive maps and statistical graphs that improved **viewing efficiency (+40%)** for administrative users.
 - I optimized report and historical generation, reducing **download times (-35%)** and streamlining decision-making.

Technologies: Angular 12, Java, JPA, SQL.

- **SMNS – System for managing unfilled medications**
 - I designed a **responsive and accessible** login interface, reducing support requests by **-15%**.
 - I implemented usability improvements in authentication, reducing **access times (-25%)**.
 - I optimized load times, achieving an average of **1.2 seconds faster**.

Technologies: HTML5, CSS3, JavaScript, Angular 17, PrimeNG, Angular Material, Flex Layout

- **CYSAPR – Application Control System**
 - I analyzed and documented key requirements that accelerated the integration of **+5 new features** and increased **development efficiency (+30%)**.
 - I created custom components (e.g., modal windows with editing) that optimized workflows and collaboration.
 - I improved visual consistency through reactive forms, increasing user engagement.
 - I integrated API consumption with TypeScript, reducing response times by an **average of -200 ms**.

Technologies: Angular, Angular Material, PrimeNG, Flex Layout, TypeScript, Git, Figma

- **EDSES – Healthcare Ecosystem for Patient Monitoring**
 - I implemented a **responsive** authentication interface, improving screen flow completion **(+10%)**.
 - I developed key components (navbar, main screens), reducing the bounce rate by improving navigation.

Technologies: React, TypeScript, Sass, Tailwind, Angular

- **Continuous learning**

Intensive **Angular 17** workshop (40 hours/week), developing practical projects that strengthened my skills to solve real-world front-end challenges.

Frontend Developer / Software Engineer at EY GDS, Mexico City

March 2022 — March 2023

- **LYNX – Employee Project Management Application**

- I refactored and optimized components with **Fluent UI**, increasing **scalability (+20%)** and reducing **load times (-15%)**.
- I fixed performance issues in **5 critical modules**, increasing **user retention rates**.
- I developed more than **12 custom components in 6 weeks**, improving **visual consistency** and reducing redesign requests.

Technologies: TypeScript, React, Fluent UI, Bootstrap 5, React-JSS, Dynamics 365, Azure Boards, Git, VS Code

- **TalentOps – Talent Data Management Platform**

- I designed more than **5 web components** with React and TypeScript, improving the platform's **usability and aesthetics**.
- Implemented **Redux** to optimize API calls, reducing **response times (-30%)** and improving interactions.
- Collaborated with design to standardize UI across **5+ platforms**, eliminating inconsistencies that caused **25% of usability issues**.

Technologies: TypeScript, React, Redux, Router, Hooks, Sass, CSS Modules, Git, VS Code, Trello

- **Highlighted Achievements**

- Recognition in **Azure** and **Cybersecurity** with EY badges, integrating these skills into real-world projects.
- **20+ courses** in cybersecurity, risk management, consulting, leadership, and communication, expanding my professional versatility.
- Preparation for **Azure Fundamentals** and **Azure Developer Associate** certifications (100+ hours of study).
- Practical project: **Creation of 6 functional components** and refactoring of **500+ lines of code**, improving performance and reliability.
- Effective communication with **English-speaking clients**, ensuring alignment throughout all phases of the project.

Software Engineer at Consorcio Jurídico S.A de C.V, Mexico City

September 2020 — June 2021

- **AGSI – Internal Request Management Application**

- Designed the web and mobile GUI, reducing request times by 15%.
- Collaborated on the application architecture, improving performance (+20%) and accelerating delivery across web and mobile.
- Developed 10 components and 5 key pages, ensuring consistency and ease of use.

Technologies: HTML5, CSS3, JavaScript, Bootstrap 5, Material Design, ASP.NET, SQL Server, Android Studio, Git

- **Notable Achievements**
 - Resolved technical issues with a 95% satisfaction rate.
 - Met 100% of established deadlines.
 - Experience working remotely, maintaining effective communication and rapid response.
 - Mobile development: Replicated the web interface in Android Studio using Java, ensuring visual and functional consistency.
 - I implemented 24+ unique features using agile methodologies, improving task execution compared to previous benchmarks.

Education

Refresher seminar, UPIICSA, Mexico City

June 2024 — September 2024

Took an interdisciplinary seminar integrating advanced technological skills into project management and auditing, ensuring compliance with international standards.

Computer Systems Engineering, Universidad San Carlos, Mexico State

August 2015 — July 2019

Skills

React & Angular

Fluent UI, Bootstrap & Tailwind

TypeScript & JavaScript

Frontend optimization and refactoring

Agile planning and collaboration

Languages

☒ **Spanish** Native speaker

☐ **English** C1

International
experience

Frontend Developer / Software Engineer, Mexico City (Mostly remote)

March 2022 — March 2023

I worked with distributed teams across **India and key US cities**, ensuring goal alignment through continuous communication and **50+ monthly meetings** that improved project efficiency.

Courses

OpenShift WorkShop at RedHat

August 2024 — August 2024

TOEFL iBT B2 at ETS

May 2024 — Present

Pre-Advanced English program at ILAC

June 2023 — July 2023

Scrum Fundamentals at CertiProf

July 2020 — July 2020

.NET Web development at TI Developer

February 2020 — May 2020
